

Ratchet Drive Counter

M50 Series

Technical Specifications

690

Right-hand ratchet, top coming

Left-hand ratchet, top going

Description:

ENM's M50 Series is a ratchet counter. Lever is returned to its original position by means of internal return spring. Compact and rugged, this counter is ideally suited for installation on machine tools, automatic vending machines, and industrial applications where only limited space is available. There will be little or no wear of the bearing. Offered in a black case in 5-digit types.

A non-overflow mechanism is incorporated in the counter to eliminate the possibility of double counting under normal operating conditions.

Specifications:

Figures: White on black background

Figure Size: .189" (4.8mm) H x .094" (2.4mm) W

Speed Rating: 1000 counts per minute

Type of Drive: Ratchet with stop; Stop-to-stop movement-typically 50° to 52°. Movement to count-typically 39° to 48°.
